

Homeopathic relief for dry and itchy skin

HOPE'S Relief is a new, natural herbal and homeopathic non-steroidal cream, which treats eczema, psoriasis, itchy dry skin, acne rosacea and other forms of dermatitis.

It combines a blend of eight potent, natural healing ingredients. Herbal extracts of calendula, licorice root and gotu kola are combined with soothing aloe vera, anti-bacterial manuka honey and the homeopathic ingredients sulphur, rhus tox and graphites.

Applied three to four times a day, Hope's Relief cream has proven itself to be an effective natural alternative to the more intrusive cortisone creams (topical steroids), often prescribed to sufferers.

Hope's Relief is available from leading independent healthstores and chemists and online at www.planetblueshop.com.
